PEP in the past 6/12?	Yes No	Details here
Use of chemsex in the past 6/12?	Yes No	Chems details Any injecting?
LMP:	Contraception: Yes No	
Cervical screening history		
In general how many times is PrEP protection needed per week, not 2 consecutive days? <i>If >2 times (not consecutive days) daily dosing schedule more suitable</i>		

In general can patient plan for event based schedule to allow for 2 hours to protection from double dose TDF/FTC?

If no, event based dosing may not be suitable

Important to highlight to patients who have a steady partner and an open relationship that they may benefit from PrEP protection with their steady partner.
